EMMANUEL OWEN
WEB DEVELOPER

For 4 years, I have studied and inscribed the sacred runes and performed the arcane rituals that breathe life into the realm of the internet. A Front-end developer passionate about delivering exceptional results and metrics and outperforming previous "best-yet". A developer who is bi/multilingual and skilled at creating a unique customer experience that highlights brand message, improves click and conversion rates by driving customer experience and keeps current on technological trends and advancement. Managed the delivery of mission-critical products to critical applications within an agile framework; Previously I focused on building accessible, human-centered products at (Hitch).

EXPERIENCE

Job Tailor UK, Lead Web Designer, February 2021 – June 2022

- Advised and managed a design thinking process that resulted in a 90% stakeholder consensus of 8 on critical design requirements; 5 of 7 design recommendations were implemented on second onboarding.
- Coordinated troubleshooting process and tested 6 prototypes to ensure quality control and assurance.
- Researched 25+ sources (websites, articles & journals) and compiled 15 recommendations to inform user interface design and SEO strategy.

Eco-Global Solutions, Junior Web Developer, October 2021 – December 2021

Outline: Design elements and components of **Eco Social App**

- Designed user profile cards and functions using angular and improved a product feature that increased usage by 70%, saving users 3 minutes.
- Devised and implemented two testing phases on the cross-platform user profile functions: browser compatible and responsive on mobile devices to ensure vision software quality.
- Built a web feature (a carousel for community project summary) that improved click-through rate by 25% among testers/users

Koana Consulting Ltd, Web Developer, March 2020 – September 2020

Outline: Manage IT infrastructure and manage web development projects.
- Led & collaborated with a team of 4 (developers & marketers) to inter-pret business requirements into end-user experience, and other design functionality into high-quality, production-ready code.
- Aggregated over 30+ documentation of excellent components to shared library accessed by 8 developers and management.
- Proposed, developed and managed new company's website that in-creased user visits and engagements by 25% as well as brought several new investors.

EMMANUEL OWEN

WEB DEVELOPER

Flexfinity Media Ltd: HITCH. Web/Software Developer, May 2017 – March 2020

Outline: Revamping & developing client/server-side designs and solutions for the HITCH software project and handling external client web projects.

- Using HTML, CSS, Bootstrap, PHP, and JavaScript to redesign the front-end elements, 8 new.html/PHP web pages for the HITCH platform (Laravel-based) were created, contributing to an increase in visits and engagements to 1000 users.
- Led a team that deployed several HITCH devices in 5 locations across Africa, resulting in nearly 85% return visits and 40% content purchases.
- Liaise with a 5-person internal team to create a utility tool using PHP to automate the self-troubleshooting feature for user connections, reducing point of failure by 30%.
- Scaled the HITCH product that successfully handled 1600 users across demo devices using raspberry pi for test deployment across West Africa.
- Performed weekly malware and security risk scans and diagnostics on in-house and client web apps, successfully reducing breaches and identifying potential failure points.

ADDITIONAL CAREER EXPERIENCE & GAP

- Completed my Premasters degree from the University of Sunderland; from March 2020 – September 2020 with a 1st class.
